Text Effects There are a lot of different text effects in Photoshop. Once you have selected the text, you can use the effects to add special effects to your text. Vector effects remove the background of your image and are ideal for adding artwork to your images. Text effects use the font (select it in the Layers panel) and automatically adjust the position and size of the text for the effect you choose. Text effects are added as layers, so you can control how much of the effect to apply and how transparent you want it to be. The most common text effects are Perspective Warp, Glow, Pattern, Bevel & Emboss and Drop Shadow. **Free Transform** Free Transform is a tool that allows you to stretch, contract, rotate and skew an object without changing its size. This is a great option when you want to change a stock picture and make it look different. You can use the Free Transform tool to change the size or aspect ratio of an object. Use the controls in the top-right corner of the panel to stretch, shrink or rotate the object. **The Gradient Fill** The Gradient Fill feature allows you to fill an image with a color gradient. You can use the settings to choose the settings of the gradient (color, opacity, angle and size). The Gradient Fill feature is a great way to fill an image with a gradient. To use the tool, select the gradient in the toolbox (it should be selected by default). The Gradient Fill tool is in the top menu bar. **Photo Merge** Photo Merge allows you to combine two images into one. This is a really handy tool, especially for combining multiple images together. It's perfect for multi-image comic strips, storyboard videos or when you want to make sure all of your images are in the same file. As the two images are combined, the tool calculates the backgrounds and adjusts them accordingly. This is a really powerful tool. Combine the layers in the Layers panel into a single file. You can also add extra layers to your strip or video to make sure everything is in the same place. The Copy and Paste Layers tools are also useful for combining images and moving them around. **The Magic Wand** The Magic Wand tool allows you to select an area of your image. You can select the area with a brush or by using the lasso tool to select the area. When you select an area with the

Judge upholds distribution of Nazi literature to youth groups SAN FRANCISCO (AP) — A federal judge has upheld the distribution of pro-Nazi pamphlets to young people attending a National Socialist Movement youth rally in San Francisco in 2017. Lawyers for the U.S. Department of Justice and the National Socialist Movement had asked U.S. District Judge William H. Orrick to throw out a lawsuit over First Amendment claims. They say the pamphlets should be considered hate speech, not protected speech. They argued the “Die Fahne hoch!” or “Raise the flag!” pamphlets do not reflect First Amendment concerns because the Nazis have abandoned that ideology and cannot be considered a legitimate political organization. But a judge with the Northern District of California Court of Appeals said in a 2-1 ruling that the pamphlets are protected speech, and the National Socialist Movement promoted it as a political speech. My Baking Journey I signed up for a baking course here in town this fall. I quickly found out that though I love baking, I am horrible at mathematics. I am someone who takes basic algebra and continues at algebra II level, but then gets stuck somewhere between Algebra III and Calculus. Then I try again and so on and so forth...Eventually I just give up and move on to my major in college. So I was so happy when I found out that I could participate in a baking course, and more importantly, that I could get a certificate of completion! After trying a few times, I've settled on the French Pastry course, taught by our own Leanne. This past week, we met for our first class and Leanne taught us a bit about her experience as a pastry chef. We learned about the difference between fats (shortening, butter, vegetable oil) and the types of flour used (all purpose, whole wheat pastry, unbleached white). Then she introduced us to our ingredients: eggs, flour, sugar, and milk. We did our own mix-ins (which I'm not one to do), then learned how to mix. Once we got going, she gave us lots of great tips on how to cook. She taught us how to determine the temperature of our ovens (if your oven is set to cook at 400 degrees, that's too hot for a sheet pan!). She also taught us how to use a
